POST TO POST CONSTRUCTION

**HERITAGE RAIL® - JOINING METHODS**

We are stockists of the Zipbolt product range.

These products can be used to assist in joining our Heritage Rail components.

For more information on the products that make up the Zipbolt range, please contact us.

**IF122 - Joining Kit**  
Used in conjunction with Makita Trimmer Router (#3707F), the joining kit makes short work of joining components.

**IF123 - Hoffman W3 Router Cutter**

**IF125 - 44mm x 8mm Multi-Groove Dowel**

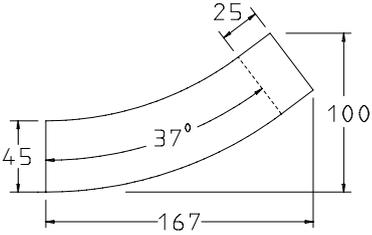

**IF124 - Hoffman W3 x 52mm Dovetail Key**

## 53° Ease Up

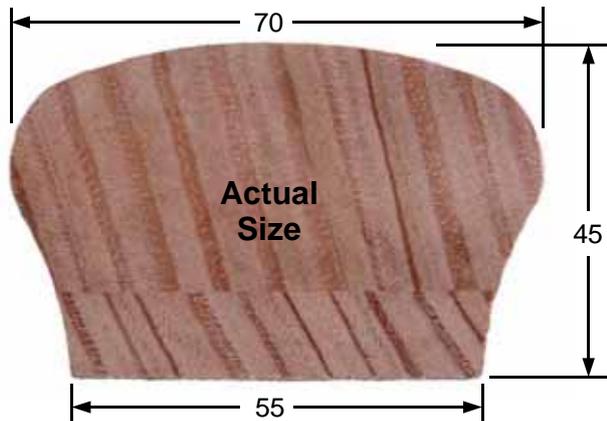

Code : **JH230**

Pine

Vic Ash

The *53° Ease Up* when used in conjunction with the *90° Ease Over (JH231)* will form a Gooseneck. This will allow the height of the handrail on the rake to be lifted up to the height of the handrail on the level or landing when continuous handrail is required.

## Rail

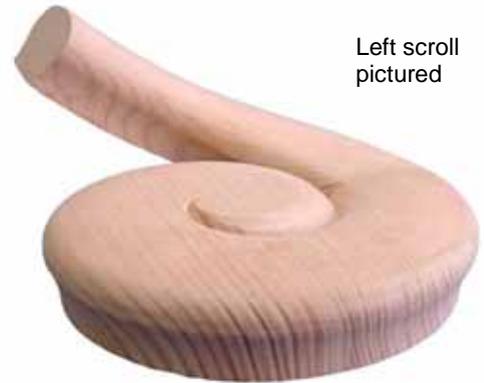

Code : **JH235**

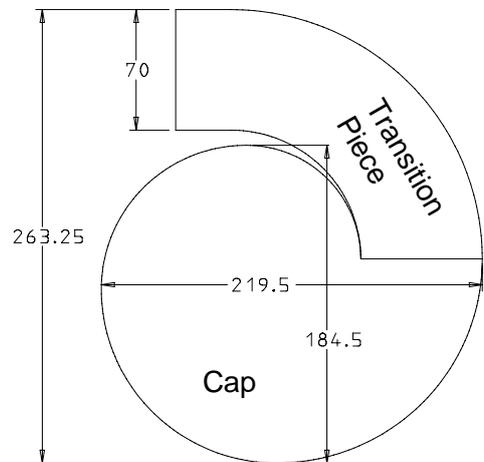

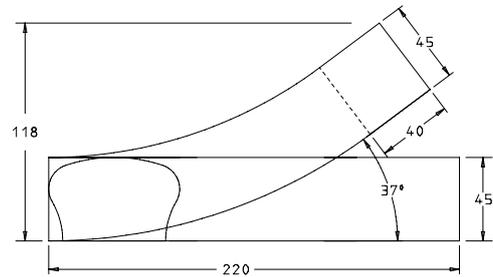

Pine (F/J Clears)

Vic Ash (Select Grade)

## Scroll (aka Volute)

Left scroll pictured

Code : **JH224 Left (Pictured)**  
**JH225 Right**

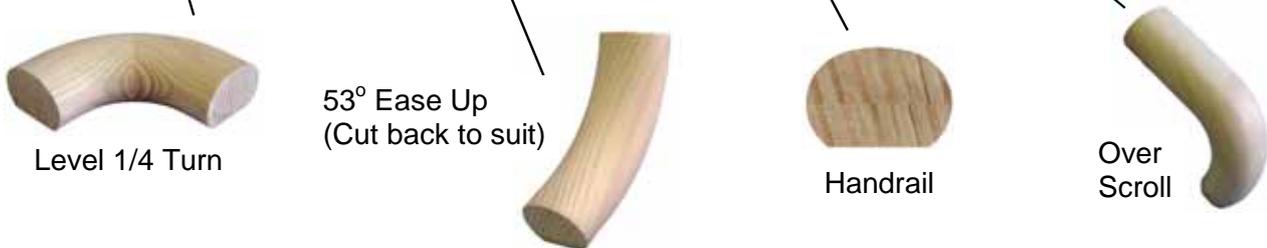

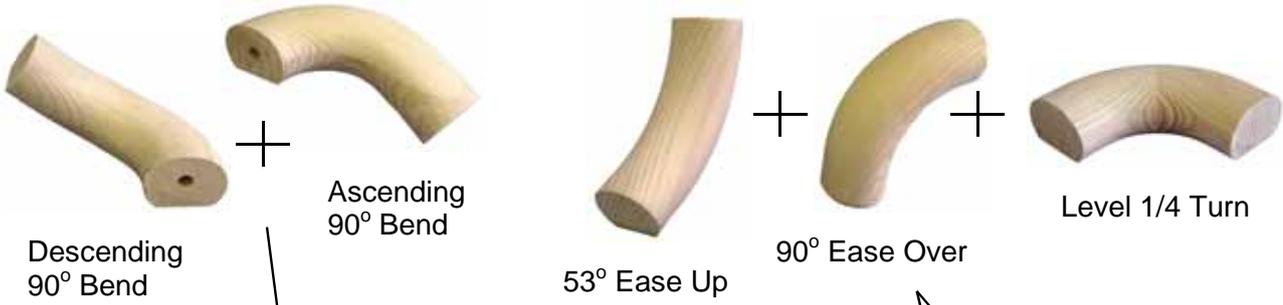

Pine

Vic Ash

Note : When ordering a scroll, the cap & transition piece will not be supplied joined. A small amount of hand finishing will be required to get the joint right.

**Finish: Satin Black**

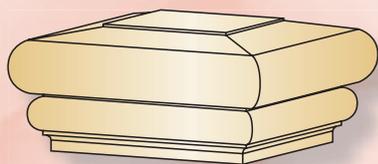

**Features of our 16mm hollow metal balusters?**

1. Bolder look than 12mm.
2. Easier handling and installation due to less weight.
3. Cuts much easier than a solid bar, which means longer blade life.
4. 1090mm length of the baluster allows the same baluster to be used on the rake (either cut string or closed) as the level.
